SANATH S GOWDA

Computer Science & Engineering Graduate | Software Development | AI & Computer Vision

Bengaluru, Karnataka, India | +91 9945816437 | 1mp22cs046@gmail.com | linkedin.com/in/sanath-s-gowda-4265222aa | github.com/Sanathgowda-17

PROFESSIONAL SUMMARY

Computer Science & Engineering graduate specializing in applied AI, full-stack systems, and automated operations. Hands-on experience architecting real-time mobile/web applications (FastAPI, React Native, WebSockets) and integrating computer vision (MediaPipe, OpenCV) with Generative AI (Gemini/OpenAI APIs). Selected for state-level KSCST student sponsorship and winner/runner-up in 2 competitive hackathons. Proven ability to build low-latency, scalable solutions.

EDUCATION

B.E. in Computer Science & Engineering — BGS College of Engineering and Technology, Bengaluru **2022 – 2026 | CGPA: 8.00 / 10**

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), Kotlin, C, SQL
- **Frameworks & Libraries:** FastAPI, React Native, Expo, Jetpack Compose, MediaPipe, OpenCV, NumPy
- **AI & Generative AI:** LLM APIs (Google Gemini, OpenAI), Prompt Engineering, Pose Estimation, Real-time CV
- **Backend & Cloud:** WebSockets, RESTful APIs, Webhooks, Cloud Firestore, Firebase Auth, Firebase Storage, MySQL
- **Tools & Automation:** Git, GitHub, Postman, Google Apps Script, Google Workspace Automation, VS Code, Android Studio

INTERNSHIP EXPERIENCE

Android & Generative AI Software Intern | MindMatrix / CL Infotech Pvt. Ltd. **Feb 2026 – May 2026**

- Engineered Android feature workflows using Kotlin and Jetpack Compose, achieving smooth 60 FPS UI rendering.
- Explored and integrated Generative AI capabilities via Google AI Studio and Cloud APIs to deliver context-aware user experiences.
- Structured Firebase Authentication and Cloud Firestore schemas; implemented structured tests reducing sprint bug rates by 35%.

PROJECTS

An Intelligent Fitness Assistant | *React Native, FastAPI, MediaPipe, OpenCV, Gemini API, Firestore* **Major Project (2025–26)**

- Co-developed a cross-platform mobile system combining real-time pose estimation, rep tracking, and AI coaching via WebSockets.
- Utilized MediaPipe Pose to track 33 landmarks and calculate joint angles across squats/push-ups, reaching 94%+ posture accuracy.
- Integrated Google Gemini / OpenAI APIs with custom prompt engineering for adaptive real-time guidance; funded by KSCST (SPP).

Automated Recurring Operations & Escalation Engine | *Google Apps Script, Webhooks, HTML/CSS* **2026**

- Built an enterprise recurrence engine automating cycle rollover across Daily, 7d, 15d, and 30d periods with working-day intelligence.
- Created a single-point Employee Workbench with filtered views, eliminating 100% of duplicated multi-sheet manual reporting.
- Deployed multi-tiered SLA logic with same-day manager alert emails, 1-click Web App acknowledgement, and executive escalation.
- Enforced LockService concurrency controls and timestamp idempotency guards, ensuring 0 duplicate cycles or notification spam.

Conversational Customer Service AI Agent | *Python, FastAPI, NLP / LLM Embeddings, REST APIs* **2025**

- Built an intelligent customer support assistant handling multi-intent queries with dynamic context retrieval and 60% faster resolution.

ACHIEVEMENTS & AWARDS

- **Runner-up:** Cyber Security Hackathon, SIT (competed among 45+ collegiate teams).
- **Top Finalist:** Ideathon, BIT, recognized for assistive technology architecture.
- **KSCST State Sponsorship (2025–26):** Awarded research grant for Intelligent Fitness Assistant under 49th Series SPP.

CERTIFICATIONS & WORKSHOPS

- **Software Testing** — NPTEL (Elite Certification)
- **Generative AI Workshop** — Accurate Info Solution + Dept. of CSE, BGS CET | Feb 2025
- **Hands-on Internship on Embedded and IoT Systems** — AICTE IDEA LAB, SJCIT + Dept. of CSE, BGS CET
