SUMMARY

Software Developer and Computer Science graduate with hands-on experience in full-stack application development, scalable backend architectures, and high-performance distributed systems. Proficient in Python, Java, JavaScript, and SQL, with demonstrated experience engineering high-throughput REST and WebSocket APIs (FastAPI), interactive frontends (React Native), and cloud databases (Firestore, MySQL). State-level KSCST engineering grant recipient and 2x hackathon winner committed to developing clean, robust, and impactful production software.

EXPERIENCE

Android and Generative AI Intern – MindMatrix / CL Infotech Pvt. Ltd.

Bengaluru | Feb 2026 – May 2026

Engineered production mobile application modules using Kotlin and Jetpack Compose under MVVM architecture, ensuring smooth 60 FPS UI performance. Architected backend API integrations with Google Cloud and AI services, implementing asynchronous request pipelines and resilient error recovery. Designed scalable Cloud Firestore NoSQL schemas and Firebase Authentication workflows, authoring unit and integration test suites that reduced sprint bug rates by 35% in a live production environment.

PROJECTS

Upadha AI — Kautilya's Test of Statecraft | Node.js, Gemini Vision OCR, Turso Cloud, Capacitor, SSE, PWA | Live App • Github

- Architected a production full-stack edtech platform evaluating UPSC CSE mains answers with real-time SSE streaming, multi-page handwriting OCR, Topper visual diff, and Dholpur House DAF interview simulation (275-mark rubric).
- Engineered a resilient dual-mode database pairing Turso Cloud SQLite (libSQL) in AWS Mumbai with local SQLite fallback for 100% uptime; packaged standalone Android APK with Capacitor and deployed live on Render.

Intelligent Fitness Assistant | Python, FastAPI, WebSockets, MediaPipe, OpenCV, React Native | Github Link

Recipient – KSCST State Engineering Research Grant, 49th Series Student Project Programme

- Built an end-to-end computer vision and pose tracking system using MediaPipe Pose to evaluate 33 skeletal landmarks with 94%+ accuracy.
- Developed full-stack mobile client and FastAPI backend enabling sub-100ms bi-directional WebSocket telemetry with asynchronous LLM form correction.

Automated Recurring Operations & Escalation Engine | Google Apps Script, Webhooks, HTML/CSS, REST | Github Link

- Engineered an enterprise scheduling engine managing recurring task lifecycles (Daily, 7d, 15d, 30d) with business-day calculation algorithms and automated rollover.
- Built centralized Employee Workbench interface and multi-tiered SLA escalation engine with LockService concurrency, eliminating 100% of reporting redundancy.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), C, C++, SQL, HTML5/CSS3

Libraries & Frameworks: Node.js, FastAPI, React Native, Expo, Jetpack Compose, MediaPipe, OpenCV, Pydantic, Capacitor, AsyncIO

Tools & Platforms: Turso Cloud (libSQL), MySQL, PostgreSQL, Cloud Firestore, Firebase, Android Studio, Git, Postman, Linux, Render

ACHIEVEMENTS & CERTIFICATIONS

- **KSCST State Research Grant:** Awarded competitive research grant for Intelligent Fitness Assistant under 49th Series SPP.
- **Runner-up, Cyber Security Hackathon:** SIT (competed among 45+ collegiate engineering teams on secure system architecture).
- **Top Finalist, Ideathon:** BIT (recognized for assistive computer vision architecture and interactive product usability).
- **Software Testing (Elite Certification):** NPTEL — Verification, Validation, Unit Testing, TDD & Test Coverage.

EDUCATION

BGS College Of Engineering And Technology — Bengaluru

B.E (Computer Science And Engineering) | 8.00 CGPA — 2022–2026

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering
